

SQAD-6 Quality Control Notice (QCN)

Sub Code: MECT

Provide a Mechanical Performance test report

Each item for which this quality statement is specified requires a "Certified Actual Mechanical Test" traceable to the lot, batch or heat number of material or serial number of the item for which it was generated. This certification shall include an analysis of the physical properties and heat treatment (if applicable) as required by the material specification referenced in the Exelon PO/Contract and its references. The certification shall reference the Exelon PO/Contract number, the material lot, batch, or heat number of the material being tested.
