

SQAD-6 Quality Control Notice (QCN)

Sub Code: OBSL

Requirements for Electronic Component Purchase Orders

If the electronic component OEM or approved electronics repair/refurbishment facility utilizes obsolete (out of production or not slated for future production) components (new/old stock (Nos)) in the repair/refurbishment of critical electronic assemblies, the components shall be identified and Exelon notified of the obsolescence issue or potential obsolescence issue prior to completion of the order.
