

SQAD-6 Quality Control Notice (QCN)

Sub Code: PQIT

Requirements for Parts Quality Initiative (PQI) Testing

To ensure quality material is installed in Exelon Nuclear Power Plant risk significant systems, Exelon requires third party testing to be performed on this part per the Parts Quality Initiative (PQI). If during the third party testing the part fails the required test, the supplier shall be liable for replacement of the part and the costs for any second and subsequent testing until a quality part can be received.

If the Supplier has questions and requires information regarding the test requirements, the Procurement Specialist listed on the Purchase Order should be contacted to provide the test requirements.
